CHINA TOPWIN

TPEB-0559

1/5th Scale 4WD Electric Powered Double the battery high-speed Off Road Buggy

Product size: 750×480mm

Wheelbase: 515mm

Gear Ratio: 11.8:1

Brushless ESC output: Hobbywing 125A

Brushless motor: 980KV

BATTERY: 11.1V LiPo 3700MAH ×2P

Servo: 20KG

Transmitter: 2.4G 2CH

The collage consists of nine individual images arranged in a 3x3 grid, showcasing different components and views of a 1/10 scale RC car chassis. The top-left image shows the chassis from a side profile, highlighting the wheels, suspension, and motor. The top-right image shows the chassis from a top-down perspective, revealing the internal layout of the motor, battery, and electronics. The middle row features three close-up shots: the front wheel and suspension on the left, the front suspension and steering mechanism in the center, and the rear wheel and suspension on the right. The bottom row includes three more close-up views: the motor and battery pack on the left, the motor and battery pack from a different angle in the center, and the rear suspension and steering mechanism on the right. Each image is watermarked with 'China Topwin'.

A horizontal number line with major tick marks at 0, 10, 20, 30, 40, 50, 60, 70, 80, 90, and 100. Each major tick mark is labeled with its corresponding number. There are also minor tick marks between the major ones, representing increments of 1. A blue dot is placed on the number line at the position of 10.
