3.5ch RC металла вертолет с камерой REH54817C

Черты

RC мешок вертолет
Поверните направо, налево летит
Право fiying с гироскопом, с камерой

AIR PHOTOGRAPH

The helicopter possesss intelligent identification circuit board, can load high pixel camera, can use as soon as install, very convenient. The camera can choose to be opened or closed ocording to operater, the angle also can be adjusted, and changed into AVI format directly after recorded.

COAXIAL SCULLS

The hight efficiency of coaxial sculls structure and the strong resistance of wind of metal balancing bar, offer sufficient power of flying, and it is smooth and easy to control for new players.

Built-in GYRO

GYRO

The gyroscope can correct the helicopter much of the deflection when flying, also have strong effect on slightly and continually deflection.

3D DIRECTIONAL FLY

The hight efficiency of coaxial sculls structure and the strong resistance of wind of metal balancing bar and double motor system, offer sufficient power of flying.

APO PROTECT SYSTEM

APO protect system can protect the helicopter's coming into obstruction or stop studently when flying. It can interrupt the power automatically, it will be more safe.

USB CHARGER CHARGING SYSTEM

The helicopter's mature USB charge technology makes you more convenient, it can change directly through a computer.

PACKING & PARTS

817C、Remote control、USB charger、USB line、Main Propeller，Tail blade.

Спецификация

Батарея вертолета: 3.7V 300mAh Li-батареи (в комплекте)
Передатчик батареи: 6 * 1.5V AA батареи (не включены)
Режим Зарядное устройство: USB зарядное устройство
Время зарядки: 60 минут
время полета: около 7 минут
Расстояние дистанционного управления: около 10 метров
Подходит для возраста: 14 лет +

Что включено

1 × вертолет
1 × передатчик
1 × USB линия
1 × Английский инструкция
1 × Лезвие A / B
