Different configuration

Normal version

Carbon fiber version

Four Style Body Shell Available

Battery installation

Easy to install tires

Very Good Silicion Tire

Instructions

TH Function switch key (Throttle)

When the front throttle is pulled backwards or pushed forwards, the remote control car will steer all the way forward or backward. If push the switch key from the N position towards F1 position, the throttle is pulled backwards, and the remote control car will backward. When the throttle is pushed forwards, and the remote control car will forward. (N shows natural, and R shows reverse)

Steering Trim Knob

- ▶ For adjusting the front tires left and right.
- ▶ Precisely adjust the steering trim in case the front tires are not straight when the steering wheel is placed at neutral position.
- ▶ Adjust again when running.

Throttle Trim Knob

The throttle should adjust in the center, then the indicator light of electronic governor is quench.

Throttle Rate Knob

Adjust gun dual rate to maximum 100%

Throttle Rate Knob

Push the controller trigger to backwards by finger, the car will forward; Push open the controller trigger to forward by finger, the car will brake and go backward. (Push open the controller trigger the first for the brake by finger, after loosening the hand and the trigger return to center, push open second for backwards.)

▶ The speed of the tire revolves is varied from the change of the "middle" position, if the trigger pressed lightly backward, under this circumstances, the speed of tire revolves will reach highest.

Forward Middle Forward Brake/Backward Forward Brake/Backward
