

3.5CH RC helikopter z kamerą metalu REH54817C

Cechy

rc helikopter torebka

Skręć w prawo, w lewo latania

Prawo flying z żyroskopu, z aparatem

BUILT-IN
DIGITAL VIDEO CAMERA

AIR PHOTOGRAPH

The helicopter possesss intelligent identification circuit board, can load high pixel camera, can use as soon as install, very convenient. The camera can choose to be opened or closed ocording to operator, the angle also can be adjusted, and changed into AVI format directly after recorded.

COAXIAL SCULLS

The high efficiency of coaxial sculls structure and the strong resistance of wind of metal balancing bar, offer sufficient power of flying, and it is smooth and easy to control for new players.

GYRO

The gyroscope can correct the helicopter much of the deflection when flying, also have strong effect on slightly and continually deflection.

3D DIRECTIONAL FLY

The high efficiency of coaxial sculls structure and the strong resistance of wind of metal balancing bar and double motor system, offer sufficient power of flying.

APO PROTECT SYSTEM

APO protect system can protect the helicopter's coming into obstruction or stop suddenly when flying. It can interrupt the power automatically, it will be more safe.

USB
CHARGER

CHARGING SYSTEM

The helicopter's mature USB charge technology makes you more convenient, it can charge directly through a computer.

PACKING & PARTS

817C、 Remote control、 USB charger、 USB line、 Main Propeller、 Tail blade.

Specyfikacja

Akumulator helikoptera: 3.7V 300mAh Li-akumulator (w zestawie)

Bateria nadajnika: 6 * 1.5V bateria AA (nie dołączone)

Tryb ładowarki: ładowarka USB

Czas ładowania: 60 minut

czas latania: około 7 minut

Zdalne sterowanie odległość: około 10 metrów

Nadaje się do wieku: 14 lat +

Co zawiera

1 × rc helikopter

1 × nadajnik

1 × Linii USB

1 × Nauka angielskiego

1 × A / B ostrze
