

2.4G 4CH Single-Propeller helicopter with servo REH079018

Quick Details

Style: Radio Control Toy

Type: RC helicopter

Power: Battery

Material: Metal

Place of Origin: Guangdong China shenzhen

Brand Name: 2.4G 4CH Single-Propeller helicopter with servo

Model Number: REH079018

function

the rise and fall, left turn, turn right, forward, backward, left, right fly flew

A high-speed (fit for flight experience operation), a low-speed (for beginners operation).

(1) Helicopter adopts high simulation shape design, application of new 2.4 G fh technology, with strong power, flight stability and reaction speed, strong anti-jamming capability etc. Characteristics. Fuselage has LED want a night light, adapt to fly at night.

Fuselage subject lightweight, concise, flight extremely stable, power output, and strong, stable and energy saving.

(2) The remote control using the latest 2.4 GHZ frequency hopping technique of frequency, and the realization of automatic automatic assignment of frequency, and precise 1D of frequency, it can separate many sets of aircraft and flight. Meanwhile has fine-tune buttons memory function, and fine-tune key has buzzer instructions. When the battery voltage, have low voltage alarm function (former three lights flash). Have LED lamp instructions power output size.

Specifications

Helicopter battery: 7.4 V 800mAh of lithium battery

Remote controller battery: 8PCS 1.5 VAA battery (no included)
Charging time: about 2-3 hour
The flight time:7 minutes
The flying height: 100 meters
Suitable for ages 14 years+
