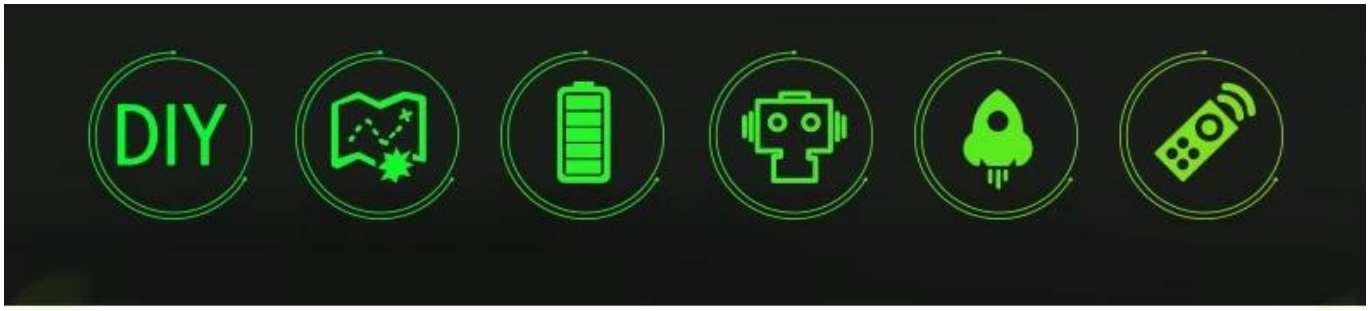
2.4G DIY ladybug Robot F10

Product description:
1.Forward, backward, turn left, turn right
2.Can run in all kinds of complex terrain
3.Three different control mode
4.Original new composite materials, durable, lightweight, can be fold around.
5.Clever movement structure design, Through the leg movement to achieve running
6.Exclusive, global patent
7.DIY

Product parameters:
1.Product Size(cm)：15.5*12
2.Color Box Size(cm)：25*20*7
3.Product Color：black-red
4.Playtime(minute)：30
5.Control distance(meter)：20-30
6.Speed(KM/H)：5.76
7.Product battery：3.7V 380hMA LI include
8.Controller battery：3.7V 100hMA LI include
9.Charging time(minute)：30

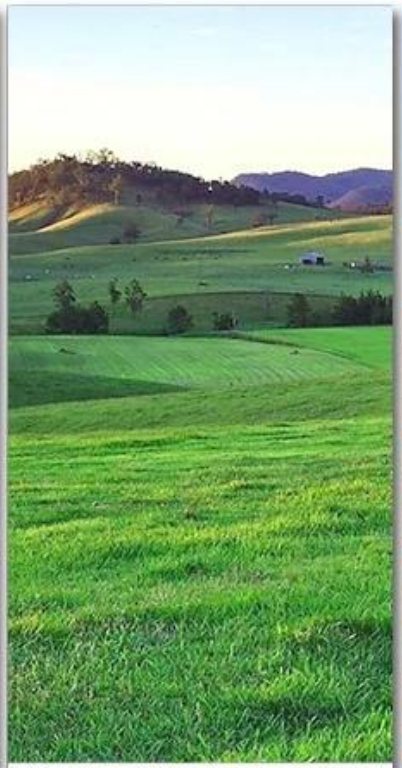
2.4G
DIY
Ladybug
Robot



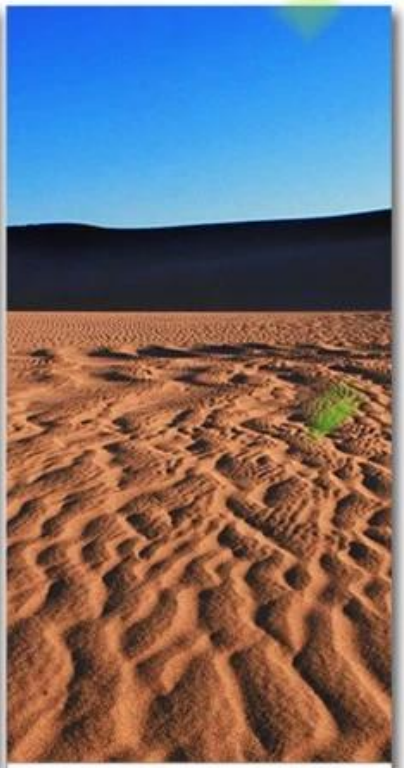
Adaptable

Can run in all kinds of complex terrain sand, gravel, ice, grass,etc

Gravel



Grass



Desert

Simulation design

The mechanical structure derives from the principle of insects' rapid movement.

DIY

Installation is similar to origami, easy and fun.Original new composite materials, durable, light weight, can be fold around.

Intelligent sensing device

Perceived touch independent analysis and action, like real insect.

More control mode

Three different control mode.joystick control, more accurate and faster reaction.

- Remotecontrol mode
- Collision perception mode
- Autonomous mode of activity

Battery

Rechargeable lithium battery. Can be quickly replaced.

Product size

Product Size(cm)：15*5*12.
Compact shape, easy to carry, sensitive, quick.
