

# ***Intelligent Telerobot***

*Remote travel, Induction control*

New Era Of Intelligence

# intelligence robot

• • • • •

Remote-controlled robots can move back and forth, left and right

Equipped with good sound effects and songs

The robot can move and move backwards by sensing gestures

Equipped with 2.4GHz remote control

Microphone intercom function and light expression function

High operability, strong playability.....

-Bright Light-

-Nice Sound-

-All Around-

-Remote Control-

-Gesture Sensing-

-Walkie Talkie-

-Eye Expression-

-Track Design-

# Omnidirectional MarchingIt

The remote control controls the robot's progress, can move around, and can flexibly turn, circle, and rotate in place

4-channel

Forward, backward, left, right

360°

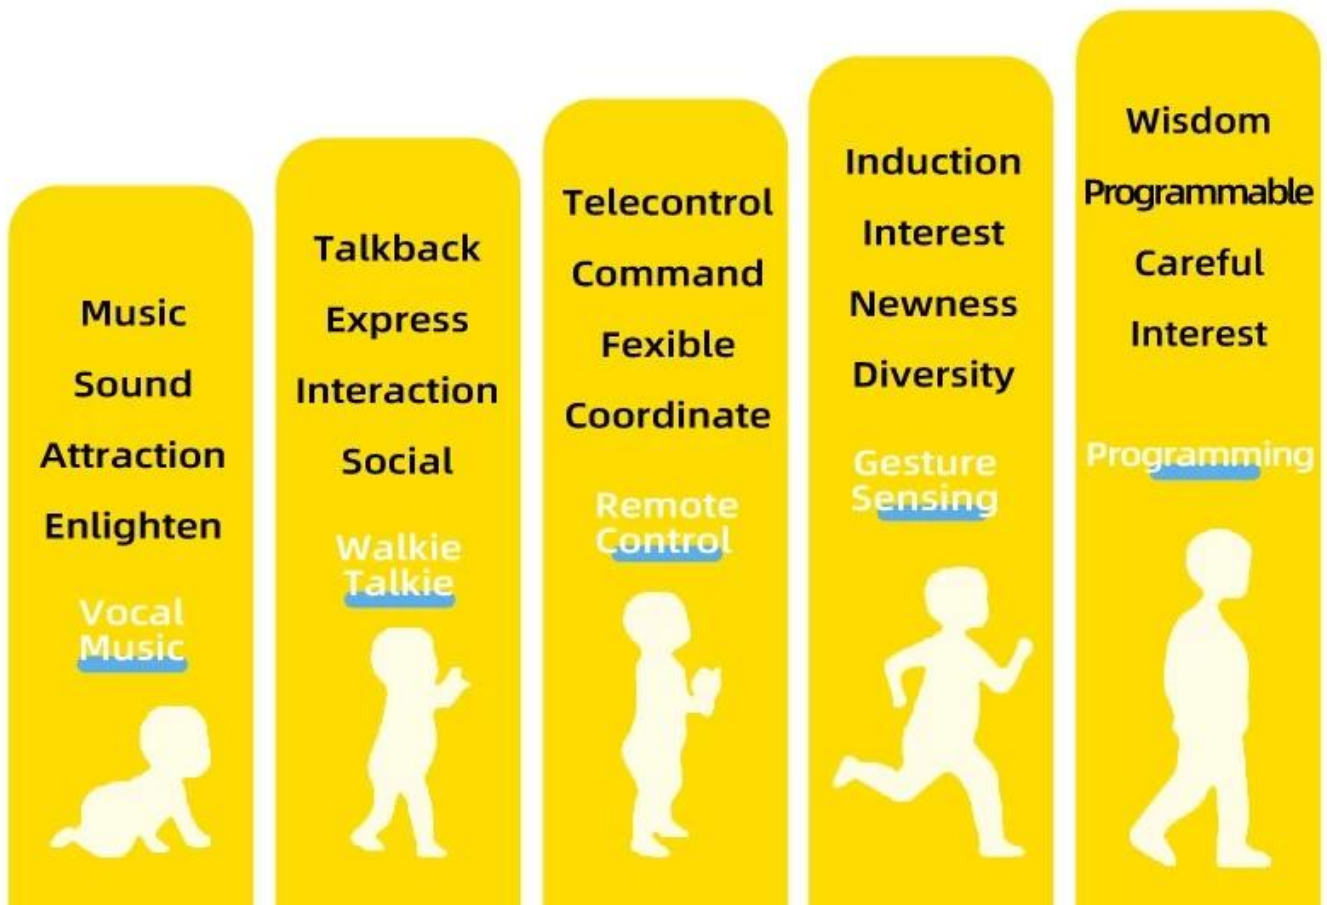

Rotation in place

**【Multifunctional Robot】**

# Meet your child's different needs

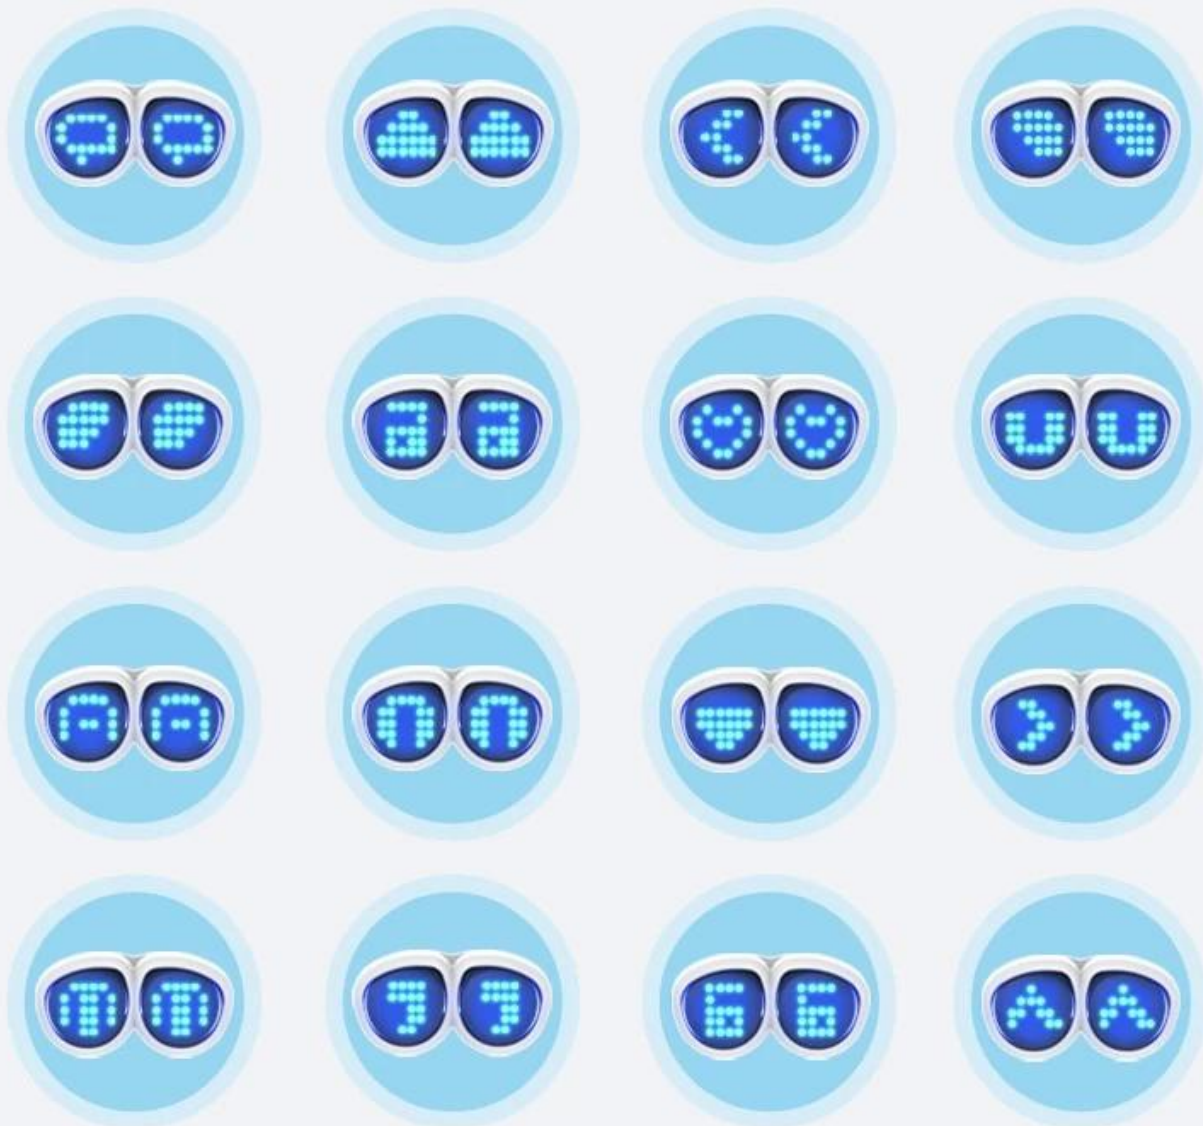

Children over 3 years old

# *LED Lights Control A Variety Of Expression Changes*

# 16 Variable Robot Eye Lights

# *Automatic eye change LED light*

***Childhood Friend***

Long press this button, the eye expression light can change automatically

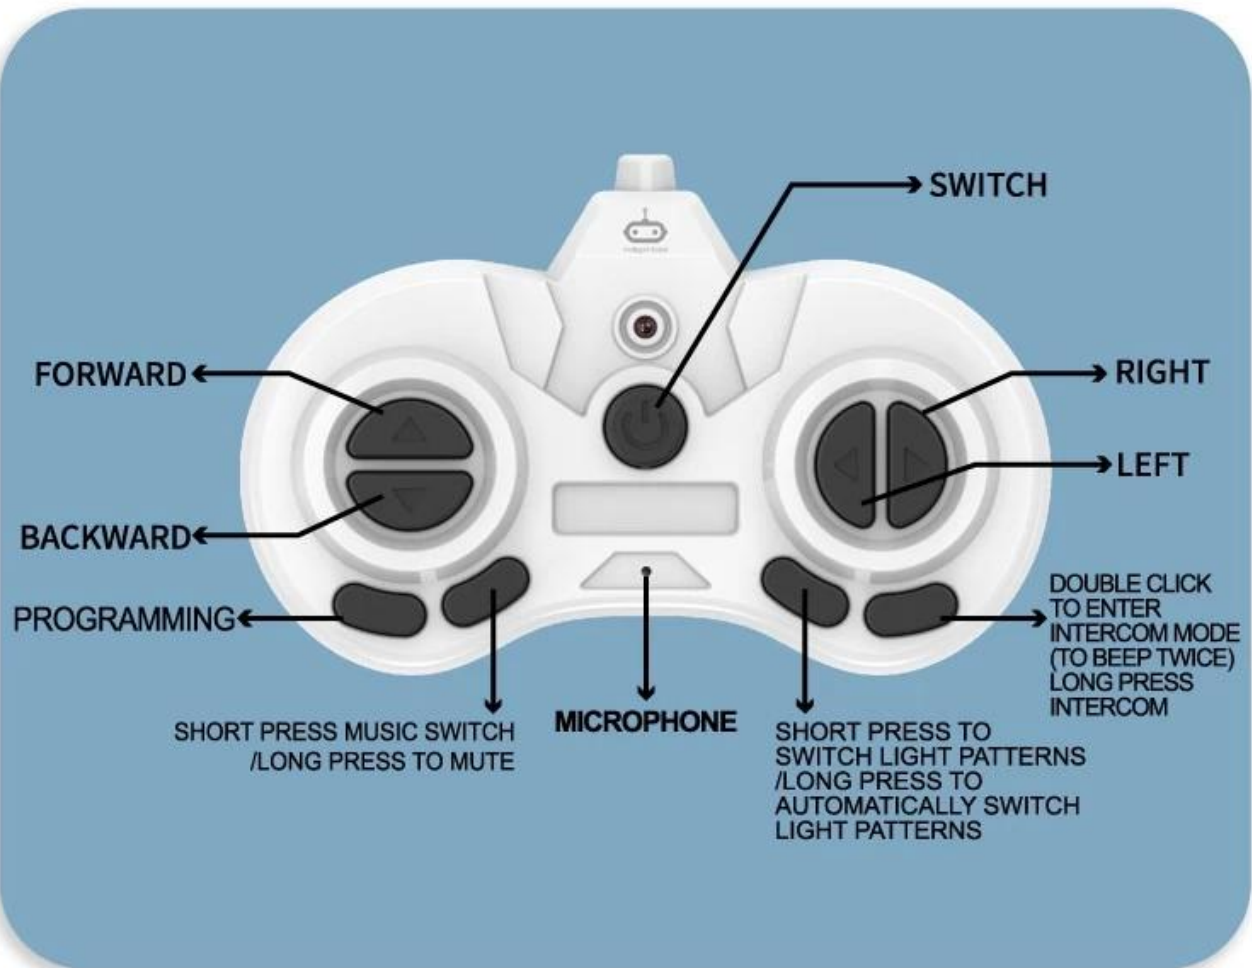

自动变化  
&  
眼神表情灯

# *Remote Control Flexible Control*

Remote control can control the robot, forward, backward, left, right and other functions, and can switch music, make different light expressions

# *Remote Control Function*

# 2.4GHz Remote Control

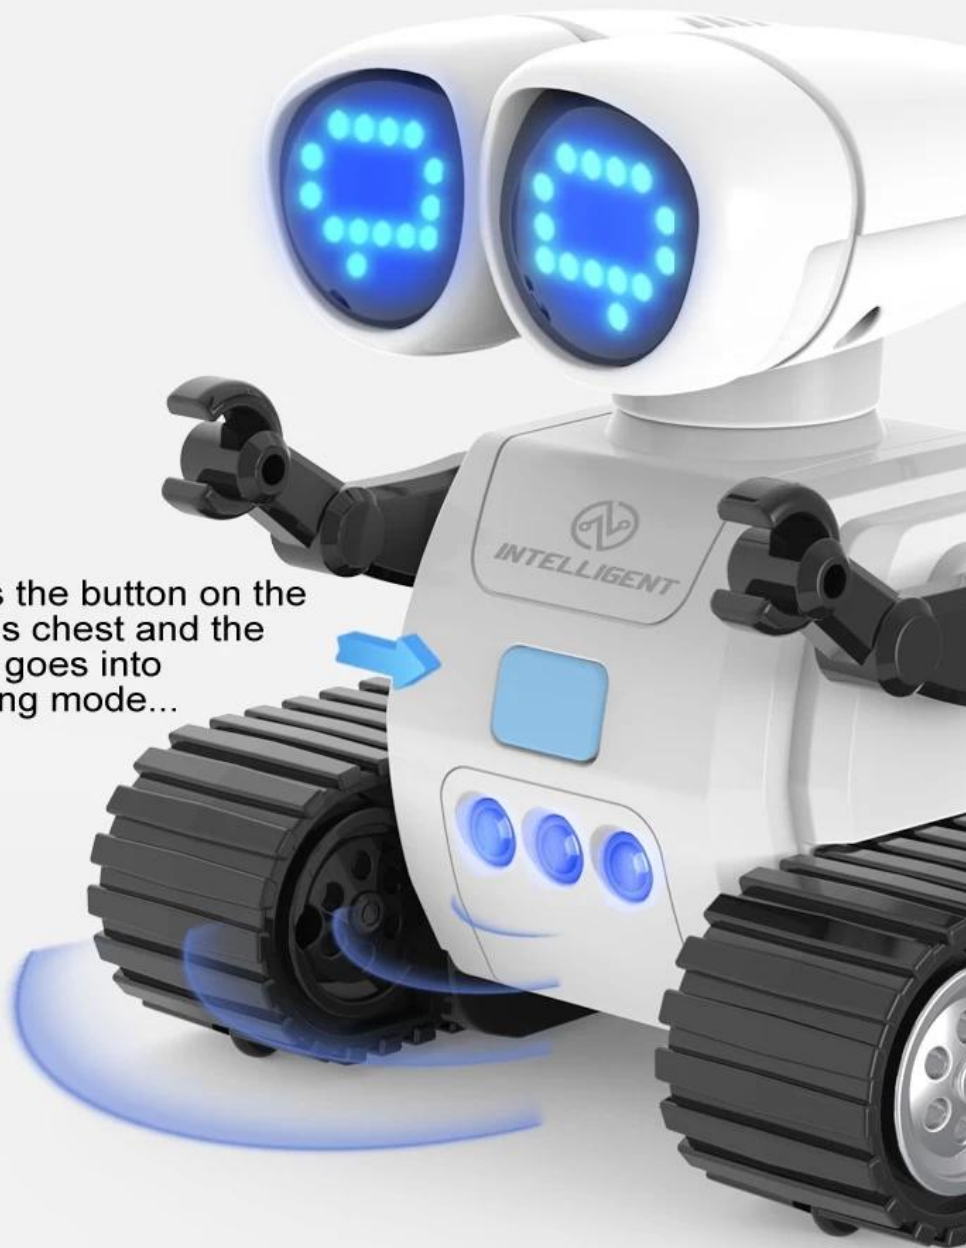

The 2.4G remote control has the characteristics of remote control and multi-person competition at the same time, even two robots can operate freely

500  
remote control  
distance

# *Upgrade The Infrared Sensor Receiving Device*

Press the button on the  
robot's chest and the  
robot goes into  
sensing mode...

# *The Robot Can Be Controlled By Gestures To Move Forward, Backward, Left, And Right*

As long as you put your hand in front of the robot, the robot will make moves such as moving forward, following, and avoiding.

# *Upgrade The Infrared Sensor Receiving Device*

**90min**

Long-life  
Endurance

**40min**

Charging Time

***The robot shape  
is very cute***

# Robot Upgrade Intercom Function

The remote control and body of the robot can be used as walkie-talkies respectively to carry out intercom functions with each other

# Product Parameter

Intelligent induction robot parameter display

## Name

Intelligent Telerobot

## Control

2.4GMHz

## Age

3+

## Charge Mode

Type-c Charging Port

## Package Size

14\*10.5\*18.5CM

## Product Size

12.6cm\*9cm\*11.7cm

## Packing Quantity

30 PCS

## Carton Size

45\*38.5\*56.8CM

## G.W./N.W

12.75 KG/11.55 KG

## RC Battery

3\*AAA

## Battery

3.7V/400MAH

## Charging Time

About 30-40 minutes

## RC Distance

30-50 Meters

## Individual weight

385g

## Function

Gesture sensing, intercom, programmable, eye light  
Expression can be changed, forward and backward, left and right

# Product Accessories

Robot

Packing Box

USB Charging Cable
